

```
ObjectConstructor<  
  First >::ConstructObject
```

```
graph LR; A["ObjectConstructor<  
  First >::ConstructObject"] --> B["Wrapper::operator()"]
```

The diagram consists of two rectangular boxes connected by a blue arrow pointing from left to right. The left box is white with a black border and contains the C++ code snippet 'ObjectConstructor< First >::ConstructObject'. The right box is gray with a black border and contains the C# code snippet 'Wrapper::operator()'. The blue arrow indicates a mapping or translation from the C++ code to the C# code.

```
Wrapper::operator()
```
